

IntelNett™ Wireless Real Time Asset Location and Personal Security Management System

“This 433MHz RTLS product outperforms similar systems, with stable locating capabilities and requiring minimal deployment and maintenance efforts.”

— Gary Hartwig, President, AppLocation Systems Inc.

IntelNett's™ system benefits include:

- Enterprise wide RTLS and Security – designed for real time tracking, locating, securing and managing assets, infants and patients
- Smallest Active tags in the world – easy to apply and mount
- Unlimited scaling – manage any number of users and combination of a wide variety of RFID tag types
- True IP based system – lowers implementation, support and management costs by using standard wired or wireless network connectivity (Ethernet, PoE, 802.11)
- Integrated Video Surveillance and Access Control – providing seamless and instant visibility
- Rapid and easy integration – with other applications, using IntelNett's open API and Argus middleware

Recognizing the importance and wisdom of deploying a single infrastructure to meet your Asset Tracking, Infant Security and Wandering Patient Protection needs, we developed the IntelNett™ Wireless Asset Management solution, a Real Time Location and Personal Security System that has the ability to support multiple applications on a single platform. Whether you want to track and locate assets to utilize your resources effectively, or protect your patients, IntelNett™ gives you the flexibility and scalability to achieve your goals.

IntelNett™ ensures a rapid ROI by reducing unnecessary capital expenditures, while equipping you with state-of-the-art technology that is standards based where available.

You have the luxury of starting with one application, and then growing your system over adding to it over time, using IntelNett superior versatility.

With the largest selection of tag types available, and the smallest tags in the industry, IntelNett™ assists you with your regulatory conformance, protects your patients, and allows for proper accounting and management of your assets.

IntelNett™ – A single infrastructure and system platform to satisfy all your tracking, location, management and security requirements.
